
TP ATTACHMENT 1-2 – PROJECT STANDARDS

Table below provides a list of standards, manuals, and guidelines that Design-Builder must use to design and construct the Project, (collectively, the “Project Standards”). Except as otherwise specified in the Contract Documents or otherwise directed by RCTC, material and workmanship specified by the number, symbol or title of any standard established by reference to a described publication affecting any portion of the Project must comply with the latest edition or revision thereof and amendments and supplements thereto in effect on the date of issuance of the last addendum to the RFP. If the manual expires or revisions are issued during the course of the Project, contact RCTC to determine if it should continue to use the manual, use the revision, or if the standard, manual, or guideline will be replaced.
